Your DENIOS Safety Update

DENIOS

2 Spill pallets and Depots
in steel

6 Spill trays for
small containers

10 Hazardous materials
cabinets

Dear Reader,

It all began with the development of the first DENIOS steel spill pallet. Over 30 years later, our customers can reap the benefit of our experience and manufacturing expertise. This can be seen in our wide range of legally-compliant products for the storage and handling of hazardous substances. And in our undertaking to produce products with the highest quality and functionality.

We offer hazmat stores in any size, for any medium and any application. We'll introduce a few of our products over the following pages, from our spill pallet to a fire-rated hazardous materials store.

Even more options can be found in our current main catalogue and our Online Shop at www.denios.co.uk/shop.

Do you have a question or need help selecting the right product?
Our DENIOS experts are available on our FREE hotline 01952 700 338.

Spill pallets and Depots in steel

Highly resilient

9 Hazmat Depot Securo Model SC-2

8 Hazardous materials depot Cubos Model L-4.2

2 Spill pallet DENIOS pro-line

1 Spill pallet DENIOS classic-line in steel for 2 x 205 litre drums, painted, accessible underneath, with grid, Order No. 259-308-OS, £ 239.00

2 Spill pallet DENIOS pro-line in steel for 2 IBCs, painted, 2 grids, Order No. 259-415-OS, £ 895.00

3 Drum support for 2 x 50/60 or 205 litre drums, galvanised, Order No. 114-527-OS, £ 139.00

4 Spill pallet DENIOS classic-line in steel for 4 x 205 litre drums, galvanised, accessible underneath, with grid, Order No. 259-321-OS, £ 362.00

5 Mobile spill pallet DENIOS base-line in steel for 1 x 205 litre drum, painted, with grid, Order No. 255-188-OS, £ 463.00

6 Spill pallet DENIOS classic-line in steel with dispensing area for 1 IBC, painted, dispensing platform, Order No. 259-385-OS, £ 863.00

Steel is a suitable material for flammable and water-polluting liquids. It reliably withstands the high loads of the medium and everyday use. The welded seams have been tested for sealing. The result: a safe, compact, space-saving solution.

- 7 Splashguard wall, galvanised, for spill pallets with a width of 1350 mm, Order No. 114-567-OS, £ 235.00
- 8 Hazardous materials depot Cubos Model L-4.2, for 4 x 205 litre drums, painted, blue, Order No. 249-911-OS, £ 1,558.00

6 PE pallet

7 Spill pallet DENIOS classic-line

Spill pallets and Depots in plastic

Extremely light

8 Drum funnel

2 PolySafe Depot Model D

8 Drum funnel

10 DENSORB mobile emergency spill kit Medium in Caddy

When handling aggressive liquids, plastic is preferred due to its high chemical resistance. Whether spill trays for small containers, drums or IBCs – as they are manufactured as a single piece in the company's own plastic rotation facility, they are absolutely leak-proof, light, easy to handle and robust. Practical accessories, for example the IBC drain extension, complete the DENIOS range with proven functionality.

1 IBC hazardous goods container, PE pallet, 1000 litre, opening NW150, drain NW50, Order No. 266-167-OS, £ 448.00 / per unit
£ 392.00 / per unit from 4 units

8 Fire-resistant underbench cabinet

9 Recirculating air filter system

The selection of a hazardous materials cabinet generally depends on which substance will be stored in it. Three types of substances are considered: water-polluting, flammable and aggressive. For each of these substances, DENIOS offers a wide range of hazardous materials cabinets, adapted to suit your needs.

4 Fire-rated hazardous materials cabinet Select

7 Fire rated hazardous materials cabinet Basis-Line

SmartStore

Contain the risk.

When a lithium-ion battery is charged, an internal short circuit can cause "thermal runaway".

This is a risk, as extremely high temperatures can be created in a very short time. This is why DENIOS has developed the new SmartStore hazardous materials cabinet for storing and charging lithium batteries. It offers a 3-stage fire warning and suppression system with 90 minute fire protection from both sides.
